PROFILE SUMMARY

Final-year B.Tech CSE student at Invertis University (CGPA: 8.8/10.0) with hands-on experience in full-stack web development using the MERN stack, React.js, TypeScript, and Tailwind CSS. Completed internships at IIT Jammu and AICTE, building production-grade platforms with REST APIs, JWT auth, cloud storage, and CI/CD pipelines. Experienced in integrating AI APIs (Claude, Gemini, OpenAI). GATE CSE 2026 qualified. Seeking full-time software engineering roles at product-based companies.

EDUCATION

Invertis University — B.Tech in Computer Science & Engineering | CGPA: 8.8/10.0

Aug 2022 – May 2026

Bareilly, UP

EXPERIENCE

IIT Jammu — Research & Development Intern

Jun 2025 – Aug 2025 | Remote

- Built a full-stack MERN car rental platform (React.js, Node.js, Express, MongoDB) with searchable catalogue, user booking system, and owner dashboard for listing and reservation management.
- Integrated ImageKit for cloud-based image storage; implemented JWT authentication and role-based access control for 50+ user and owner accounts. Deployed on Vercel with production CI/CD pipeline.
- Collaborated in an Agile 4-member team using Git branching workflows, delivering all project milestones on schedule.

AICTE — Web Development Intern

Apr 2025 – Jun 2025 | Remote

- Built a functional e-commerce frontend with product listing, cart, checkout, filtering, and search using Redux Toolkit for state management and FakeStoreAPI for real-time product data via Redux Thunk.
- Designed a responsive UI with React.js and Tailwind CSS; wrote clean, modular component architecture following best practices for scalability and code reuse.

PROJECTS

InkMind — AI-Powered eBook Creation Platform | React 18, TypeScript, Supabase, Claude API

shorturl.at/cv491

- Built a full-stack AI eBook creation platform where users generate, edit, and export structured eBooks using the Claude API with real-time streaming responses.
- Architected the frontend in React 18 with TypeScript; used Supabase for authentication, PostgreSQL database, and file storage — replacing a full backend with a serverless stack.
- Designed rich text editor with chapter management, cover image generation, and one-click PDF export; deployed on Vercel with environment-based API key management.

Full-Stack Task Manager | MongoDB, Express, React, Node.js, Tailwind CSS

shorturl.at/gnv3z

- Built a full-stack MERN task management application covering backend essentials including database integration, user authentication, and secure REST API development.
- Developed a dynamic, responsive frontend with React featuring client-side routing, search filters, and robust error handling following production-grade best practices.
- Deployed the complete application to a live hosting environment; implemented modular component architecture ensuring scalability and clean code reuse across the project.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, HTML/CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Vite, React Router

Developer Tools: VS Code, Git, GitHub, Postman, MongoDB Atlas, Supabase, Vercel, ImageKit

AI & Integrations: Claude API, Gemini API, OpenAI, Clerk, Stripe, Inngest, CodeRabbit

CERTIFICATIONS

- The Complete Full Stack Web Development Bootcamp | Udemy – Angela Yu
- Complete AI & LLM Engineering Bootcamp | Udemy – Hitesh Choudhary
- Data Structures & Algorithms | Codehelp – Love Babbar

ACHIEVEMENTS & EXTRACURRICULAR

Hackathon – Top Performer | Invertis University / Inverthon 2024 | Bareilly, UP

2024

- Secured top placement by building an AI-based waste management system in 24 hours; led a 3-member team managing task distribution, Git workflow, and final presentation to industry judges.
- GATE CSE 2026 qualified (Score: 429 | AIR ~13,429 | EWS category) — demonstrated strong CS fundamentals across algorithms, OS, DBMS, and computer networks.
